PROFESSIONAL SUMMARY

Final-year Computer Science undergraduate (CGPA 9.38) with a strong foundation in Data Structures, Algorithms, and Object-Oriented Programming across Java, Python, and C. AWS Support Engineering intern experienced in building and monitoring cloud infrastructure. Built full-stack and cross-platform applications end-to-end, from data modeling to deployment. Seeking an SDE role to design and build scalable, reliable backend systems.

KEY SKILLS

Languages: Java, Python, C

Core CS: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, DBMS

Cloud & Databases: AWS ,SQL

Tools: Git, GitHub, REST APIs, Linux

EXPERIENCE

Support Engineering Intern (AWS) — Amazon India *May 2025 – Jul 2025*

Project: AWS Storage Management Dashboard | Bengaluru

- Designed and developed a centralized dashboard for monitoring Amazon S3, EBS, EFS, and RDS resources through a unified web interface.
- Integrated AWS SDK, Amazon CloudWatch, and IAM-based authentication to enable secure storage management, real-time monitoring, utilization analytics, and automated alerts, improving operational visibility.

PROJECTS

Predictive Multimodal Student Engagement & Cognitive Monitoring System

Tech Stack: Python, OpenCV, MediaPipe, CNN, YOLOv8, LSTM , MongoDB

- Designing a real-time computer-vision system in a 4-member team to monitor student engagement from live webcam video, using facial landmark detection, gaze tracking, and device/person detection.
- Defined the data pipeline using arrays, queues, and hash maps for real-time frame buffering and student-to-embedding lookups, plus an LSTM model design to forecast attention drops from engagement history.

Women RescueRush — AI-Powered Women's Safety Application

Tech Stack: React Native, Expo, TypeScript, Node.js, Express.js, MongoDB, Firebase, Google Maps API

- Built a cross-platform safety application with one-tap SOS alerts, AI-powered shake detection, a fake-call feature, and real-time location sharing with emergency contacts and authorities.
- Implemented secure cloud-based storage for emergency evidence, integrating Firebase and MongoDB for reliable data persistence.

GreenScore Bengaluru — Smart Waste Management Platform

Tech Stack: React.js, Node.js, SQLite

- Developed a full-stack web application enabling citizens to report garbage issues with photo uploads and location tracking.
- Built a centralized admin portal for BBMP officials to manage and resolve complaints, streamlining civic issue tracking.

EDUCATION

Bachelor of Engineering, Computer Science — Bangalore Institute of Technology *2023 – 2027*

CGPA: 9.38

PCMB — Brilliant PU College, Hassan *2021 – 2023*

98%

10th Grade — Vijaya School *2021*

99.36%

CERTIFICATIONS

- AFE Bootcamp — Java & Data Structures, NavGurukul (Feb 2025)
- Data Structures & Algorithms in Java, Infosys Springboard
- Linux Training for IT Job, O'Reilly (Jun 2025)
- AWS Educate Machine Learning Foundations, Amazon Web Services (Jul 2025)
- Introducing Generative AI with AWS, Udacity (Jun 2025)
- Future AWS AI Engineer, Udacity (Oct 2025)
